SUMMARY

I am a motivated web developer with experience building template modules using HTML, CSS and JS. I also have Full Stack experience building apps in a React with Redux Front End and a Typescript Express Back End. With strong collaboration skills, a passion for problem solving and the tenacity to keep going no matter the pressure, I want to solve big problems with others and build beautiful apps along the way.

EMPLOYMENT

Lighthouse Labs
Remote
Project Evaluator · Dec. 2020 to Current
• Provides constructive feedback to students for completed projects in the 12 week Web Development Bootcamp
• Evaluation of javascript fundamentals in projects built with node.js, express.js, and react.js using custom hooks and reducer

WXM
